JOBOPS: ENHANCEMENTS 2013 R2 USER GUIDE LAST REVISED 2013

INTRODUCTION

This user guide provides information on new features released in version 2013 R2.

DESCRIPTION OF ENHANCEMENTS

- Overhead tracking: Enhancement 1-5458
- Customer Memos: Enhancement 1-4284
- Work Ticket Memos: Enhancement 1-4677
- Equipment Asset Memos: Enhancement 1-4283
- Service Agreement Memo
- Service Ticket Creation – Adding Parts: Enhancement 1-5970
- Technician Dashboard - Refresh: Enhancement 1-5899
- Technician Dashboard – Misc Time: Enhancement 1-5954

The customizations are described in more detail on the following pages.

OVERHEAD: ACCOUNTS PAYABLE / LABOR / PARTS

WORK TICKET CLASS MAINTENANCE: OVERHEAD TAB

A new tab has been added to Work Ticket Class Maintenance, Overhead. This tab assigns overhead Types, Rates/Amounts and the general ledger accounts for overhead being applied to Accounts Payable Invoices and parts.

Accounts Payable:

Calculate Overhead: Activate this checkbox to calculate overhead costs to Accounts Payable Invoices that are associated with a work ticket. Overhead will be applied to invoices which are created from AP Invoice data entry or from Manual Check entry.

Overhead Type: The overhead type can be defined as a Percent Rate or an Amount.

Percent / Amount: Assign a percentage rate to be applied to the extension amount of a line. This field is labeled Percent when Overhead Type has been assigned Percent.

Assign an amount to be applied to the line when the overhead type has been defined as Amount. The field name will be labeled Overhead amount.

Overhead Account: Assign the general ledger cost account that the overhead costs should debit. This is an Applied Overhead account and is the offset to the WIP posting. This account will be posted to during Accounts Payable Invoice update or Manual Check update.

Parts:

Calculate Overhead Default: Activate this checkbox to calculate overhead costs to work ticket components. When components are added to the work ticket the Overhead checkbox will be activated.

Overhead Type: The overhead type can be defined as a Percent Rate, Flat Rate or Unit Rate.

Percent / Flat Rate / Unit Rate: Assign a percentage rate to be applied to the extension amount of a line. This field is labeled Percent when Overhead Type has been assigned Percent. The calculation for the overhead cost is the cost extension multiplied by the assigned Percent Rate.

Assign an amount to be applied to the line when the overhead type has been defined as Flat Rate. The field name will be labeled Flat Rate Amount. The Flat Amount performs no calculation and is the same amount independent of Quantity Shipped and Unit Cost.

Assign a unit rate that will be applied to the line item. This is a calculation of the Quantity Shipped multiplied by the defined Unit Rate. The field will be displayed as Unit Rate Amount.

Overhead Account: Assign the general ledger cost account that the overhead costs should debit and is an Applied Overhead Account. This account will be posted to during the Daily Parts Usage update and is the offset to WIP.

*****Important: If a Work Ticket Class is assigned to any open work tickets, the Overhead Type and its corresponding Rate field will be disabled. This is a measure to maintain overhead cost integrity.**

WORK TICKET CLASS HARDCOPY PRINTING

Work Ticket Class Hardcopy printing has been modified to include overhead tab information.

Work Ticket Class Listing

Overhead Type: Unit Rate Amount
Unit Rate: 7.54
Overhead Account: 595-00-000 Allocated Overhead

ACTIVITY CODE MAINTENANCE

A new tab has been added to Activity Code Maintenance, Overhead. This tab assigns overhead Types, Rates/Amounts and the general ledger accounts for overhead being applied to labor and is an additional cost calculated separate of Burden.

The screenshot shows the 'Activity Code Maintenance' interface. At the top, the 'Activity Code' is 'QA' and the 'Description' is 'QUALITY'. Below this, there are four tabs: '1. Main', '2. Accounts', '3. Scheduling', and '4. Overhead'. The '4. Overhead' tab is selected. The form contains the following fields:

- Overhead Type:** A dropdown menu set to 'Percent'.
- Overhead Percent:** A text input field containing '20.00'.
- Overhead Account:** A text input field containing '424-00-000' with a magnifying glass icon to its right.
- Overhead on Direct Labor:** A text input field containing 'Overhead on Direct Labor'.

Overhead Type: The overhead type can be defined as a Percent or an Amount.

Percent / Amount: Assign a percentage rate to be applied to the activity code. This field is labeled Overhead percent when Overhead Type has been assigned Percent. The percent rate will be applied to the Employee Rate or Activity Code Standard Rate as determined by the work ticket class.

Assign an amount to be applied to the line when the overhead type has been defined as Amount. The field name will be labeled Overhead Amount.

Overhead Account: Assign the general ledger cost account that the overhead costs should debit. This account will be posted to during the cost recognition of the overhead costs during a Sales Journal update.

ACTIVITY CODE HARDCOPY PRINTING

Activity Code Hardcopy Printing has been modified to include overhead information.

WORK TICKET CREATION: PARTS OVERHEAD DEFAULT

When creating a work ticket manually or from a Work Ticket Template, the part Overhead checkbox will be assigned as defined by the Work Ticket Class's Calculate Overhead Default.

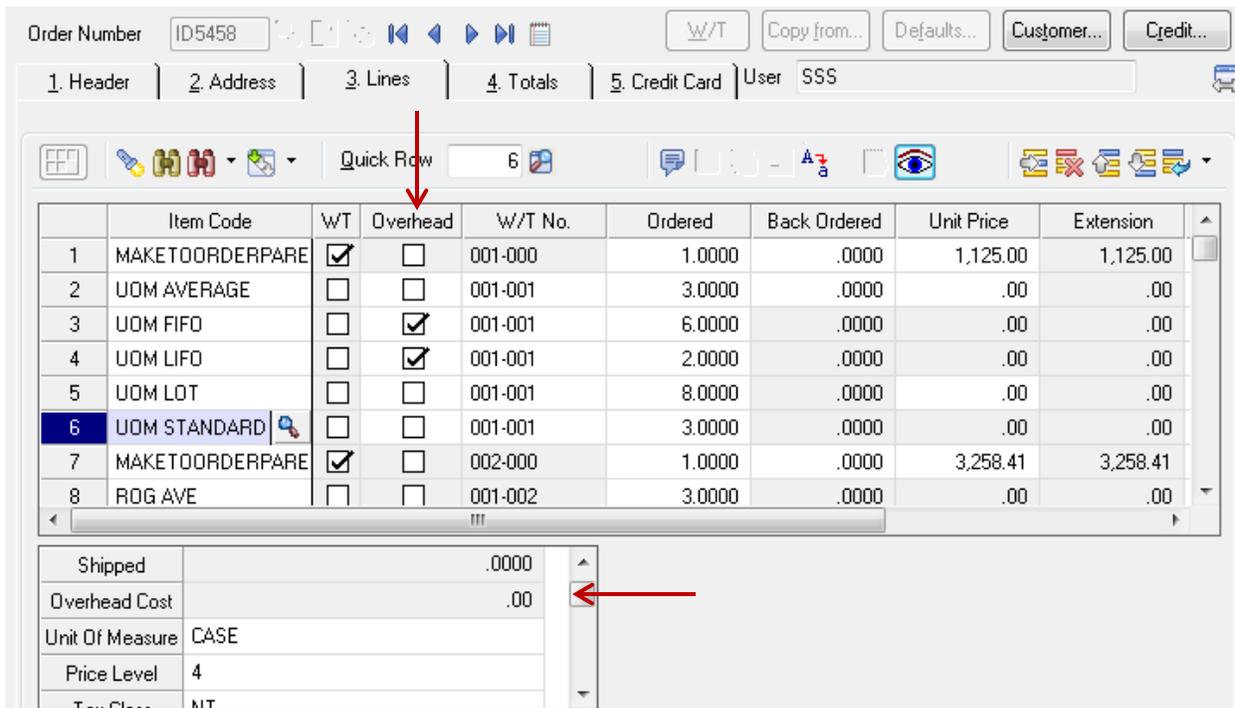

When creating a work ticket by copying from an open or historical work ticket, the overhead checkbox will default as defined by the part being copied.

SALES ORDER ENTRY: LINES

An Overhead checkbox and Overhead Cost field have been added to Sales Order Line Entry.

When the Work Ticket Class option, Calculate Overhead Default is activated, during the process of adding work ticket parts, the Calculate Overhead checkbox will be activated. This checkmark may be removed by the user if overhead should not be calculated for the part entered.

The Overhead checkbox will be disabled if the line item is set as a parent item, if the line item does not have a work ticket assigned to it or a chargeable work ticket item has been billed.

WORK TICKET ENTRY: PARTS ENTRY

An Overhead checkbox and Overhead Cost fields have been added to Work Ticket Parts Entry. When the Work Ticket Class option, Calculate Overhead Default is activated, during the process of adding work ticket parts, the Calculate Overhead checkbox will be activated. This checkmark may be removed by the user if overhead will not be calculated for the part entered.

Once a part has been issued, the Overhead checkbox field becomes disabled and cannot be modified unless the parts are unissued and the Qty Used field is 0.00.

Overhead Cost field is information only and the user will not have access to edit this field. The Overhead Cost field will populate when parts are issued.

Overhead Cost Calculations for Parts

Flat Rate: Flat Rate is an assigned cost that is assigned per line item. The same rate is costed independently of the item's cost or shipped quantity.

Percent: Overhead cost is calculated from the item's cost extension (Unit Cost * Quantity Shipped) * Percentage Rate

Unit Rate: Overhead cost is calculate by the defined Unit Rate * Quantity Shipped

Dynamic Inventory Transactions: Overhead Flat Rate

A new transaction type, OA (Overhead Allocation) has been created for overhead type of Flat Rate. The OA transaction will be created when an items Qty Issued is no longer 0.00.

If additional quantities are issued, no new OA record will be created nor will the existing record be modified.

If the Quantity issued is reduced to 0, a new OA record will be created for a negative amount, backing out the overhead costs, for no quantities have bow been issued.

Activity	PI	Product Issue			
Step	001	Step 001 - UOM items WT Entry			
Item Code	UOM FIFO	FIFO Costed Items	U/M	CASE	
Whse Code	000	WESTERN WAREHOUSE	Parts Cost	327.660	
Promise Date	9/23/2013	Qty Required	6.0000	Overhead Cost	8.200
Chargeable	<input type="checkbox"/> Overhead <input checked="" type="checkbox"/>	Qty Used	2.0000	Total Cost	335.860
G/L Acct	980-00-000	Work In Process: PARTIAL BILLINGS	Invoice No		

Trans Date	Time	Who	Whs	Type	Src	Reference	Quantity Used	Unit Cost	Overhead	Total Cost
11/11/2013	03:17 PM	SSS	000	II	SO	ID5458	2.0000	16.383	.000	327.660
11/11/2013	03:17 PM	SSS	000	OA	SO	ID5458	.0000	.000	8.200	8.200

The Quantity Used and Unit Cost will be 0.00 for the OA transaction and only reflects the flat rate overhead cost.

DATA COLLECTOR

- The tab delimited file has been modified for Parts import and accommodates the assigning of Y or N for calculation of overhead on parts. Add Y to the last column of the import file to calculate overhead on parts and N for no overhead on parts.
- Overhead costs cannot be imported.
- If the overhead column is left blank it will assign overhead as assigned by the work ticket class default for Parts Overhead.
- Rules for issuing quantities to existing lines has been modified. The calculate overhead value in the import file must match that of the existing work ticket component. If the calculate overhead value is different a new line will be created.

Edit Transaction Records: Parts Transactions

An Overhead checkbox has been added for Parts Transactions. This is an editable field that can be modified. The overhead costs will not be displayed are calculated during the Update process.

				Qty Received	.0000

DAILY RECEIPTS REGISTER / UPDATE

The Daily Receipts Register has not been modified and will not print the calculated overhead costs for items that are linked to work tickets and the Overhead checkbox is activated for the item being received.

The Daily Receipts update will update the calculated overhead costs for work ticket components that are issued to the Daily Parts Usage Register and to the work ticket.

MAKE TO STOCK: SUBALLOCATION REGISTER

When invoicing make to stock work tickets where the parent items will be automatically issued to another work ticket, the overhead option for that component will be evaluated and overhead will be calculated at the time the part is issued.

ACCOUNTS PAYABLE: INVOICE DATA ENTRY

Overhead cost will be calculated for line items which have been distributed to work tickets only **and** the work ticket class has been designated to calculate overhead on AP invoices.

The Overhead Cost field is display only. The user has no access to enter, modify or delete the overhead cost amount.

Total Hours

An arrow displays in the column that was selected for sorting and will point down when sorted in descending order and will point up when displaying in ascending order.

TIME TRACKER ENTRY

Time Tracker Entry has not been modified to display overhead costs during data entry.

DATA COLLECTOR

Data Collector has not been modified to display overhead costs.

SERVICE TICKET BILLING

Service Ticket Billing – Labor has not been modified to display overhead costs.

TECHNICIAN DASHBOARD

Technician Dashboard – Labor has not been modified to display overhead costs.

DAILY LABOR REGISTER/UPDATE

The Daily Labor Register does not have a unique column for overhead costs, however, the Total Cost column is a sum of the Labor cost, Burden cost and Overhead Cost.

The G/L Summary for Cost includes the total overhead costs calculated and posts to the GL account as defined in Applied Labor Account Maintenance.

Daily Labor Register

REGISTER NO: JT-0031

FRX DATE: 10/18/13		W/T CLASS MF - MAKE TO ORDER - FLAT

SALES ORDER INVOICE DATA ENTRY

Sales Order Invoice Data Entry has been modified for overhead.

Work Ticket Billing Selection

Work Ticket Billing Selection has been modified for work ticket classes which have Flat Rate overhead.

When the work ticket has components which are linked to purchase orders and have not been received complete, the Yes option to Bill Complete? will not be available. The OA transaction must be created for items that are linked to purchase orders prior to invoicing the work ticket complete.

Work Ticket	Description	Bill Complete?	Quantity	
001-000	Make to Order Parent item	<input type="checkbox"/> No <input type="checkbox"/> Skip	1.0000	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

Invoice Data Entry

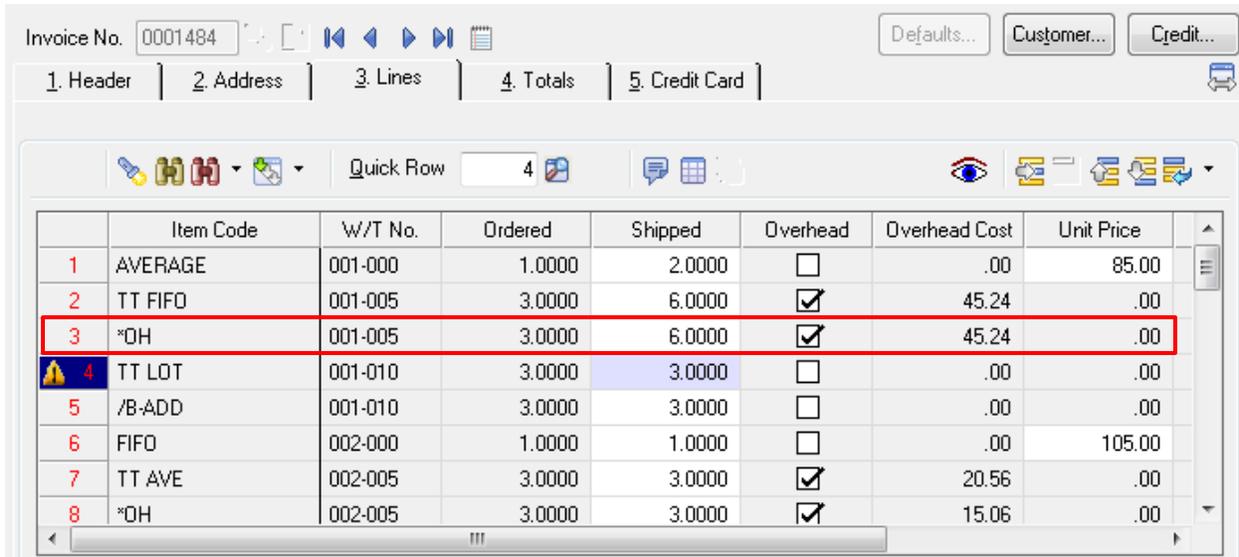

The Overhead checkbox and Overhead Cost fields will be displayed in invoice data entry, however, the fields will be disabled.

Invoice No. 0001484

1. Header | 2. Address | 3. Lines | 4. Totals | 5. Credit Card

	Item Code	W/T No.	Ordered	Shipped	Overhead	Overhead Cost	Unit Price
1	AVERAGE	001-000	1.0000	2.0000	<input type="checkbox"/>	.00	85.00
2	TT FIFO	001-005	3.0000	6.0000	<input checked="" type="checkbox"/>	45.24	.00
3	*OH	001-005	3.0000	3.0000	<input checked="" type="checkbox"/>	22.62	.00
4	TT LOT	001-010	3.0000	3.0000	<input type="checkbox"/>	.00	.00
5	/B-ADD	001-010	3.0000	3.0000	<input type="checkbox"/>	.00	.00
6	FIFO	002-000	1.0000	1.0000	<input type="checkbox"/>	.00	105.00
7	TT AVE	002-005	3.0000	3.0000	<input checked="" type="checkbox"/>	20.56	.00
8	*OH	002-005	3.0000	3.0000	<input checked="" type="checkbox"/>	15.06	.00

The Overhead Cost field will update accordingly if the shipped quantity is modified.

	Item Code	W/T No.	Ordered	Shipped	Overhead	Overhead Cost	Unit Price
1	AVERAGE	001-000	1.0000	2.0000	<input type="checkbox"/>	.00	85.00
2	TT FIFO	001-005	3.0000	6.0000	<input checked="" type="checkbox"/>	45.24	.00
3	*DH	001-005	3.0000	6.0000	<input checked="" type="checkbox"/>	45.24	.00
4	TT LOT	001-010	3.0000	3.0000	<input type="checkbox"/>	.00	.00
5	/B-ADD	001-010	3.0000	3.0000	<input type="checkbox"/>	.00	.00
6	FIFO	002-000	1.0000	1.0000	<input type="checkbox"/>	.00	105.00
7	TT AVE	002-005	3.0000	3.0000	<input checked="" type="checkbox"/>	20.56	.00
8	*DH	002-005	3.0000	3.0000	<input checked="" type="checkbox"/>	15.06	.00

The Shipped amount was updated to 6 and the overhead cost recalculated for this change.

Flat Rate Overhead

Chargeable work ticket components cannot be partially shipped on an invoice that is not billing the work ticket complete when the chargeable component is flagged to calculate overhead and the work ticket class overhead for parts is set to Flat Rate.

If a chargeable component has been partially issued prior to invoicing, the Shipped Quantity will update as the Ordered Quantity when partially invoiced. Chargeable components cannot be split during invoicing and must all be shipped or none.

If the user modifies the ship quantity to less during a partial invoice of a Chargeable component that has the Flat Rate overhead costing method, the following message will appear:

DAILY SALES JOURNAL UPDATE

WORK TICKET INVOICE DETAIL REPORT

The Work Ticket Invoice Detail report has been modified to include overhead costs in the total cost of the item, AP invoice, or labor cost.

- DC (Accounts Payable Invoices and Manual Check) costs will include the overhead costs.
- LD (Direct Time Entry / Time Tracker Entry) costs will include the overhead costs.
- NC and CC (Parts Usage) costs will include overhead costs.

Overhead costs are not reported separately and there is no method to determine which costs include overhead.

Section 3: SJT Transaction

Transaction Totals: 4.0000 | 13.750 | 30.160 | 85.160

Section 1: SO Detail

This section represents the data that resides in the sales order detail file for the work ticket component. The following fields have been added to the panel:

- Warehouse Code and Warehouse Description
- Chargeable checkbox
- Overhead checkbox
- Overhead Cost – displays the calculated overhead costs when a part has been issued
- Total Cost – the sum of the part cost and overhead cost

Section 2: JT Transaction

The data displayed here represents additional information for the highlighted item in Section 3. The GL Account Description has been added.

Section 3: JT Transaction

The data displayed here represents the issued items details. An overhead cost column has been added. The Total Cost is a sum of the (Unit Cost) * Qty Used + Overhead Costs.

Labor

The Labor tab has been modified, adding an Overhead Cost field. The Total Cost field has been modified to be the sum of Labor Cost, Burden Cost and Overhead Cost.

Copy Ship To

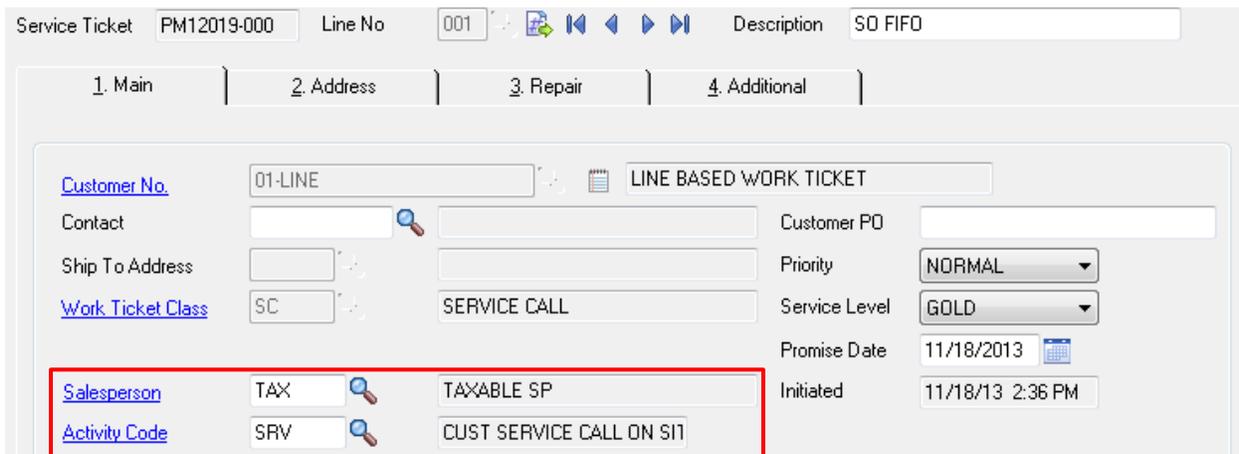

- The Service Agreement Bill To will always be assigned, and can be removed
- The Customer Bill To will be assigned if no service agreement is ever assigned, and can be removed.

SERVICE TICKET ENTRY: MAIN

A Salesperson and Activity Code field have been added to the Main tab of Service Ticket Entry.

The Salesperson field will populate from the Customer No entered. The Salesperson field may be changed on any step, however, any change will update all steps since the Salesperson field is a sales order header field.

The Activity Code field will default in from the default activity code assigned to the Work Ticket Class. This field can be unique for each step.

The Priority and Service Level can now have unique values for each step and is now stored at a detail level rather than at the header level.

SERVICE TICKET CREATION: PARTS

The Repair Parts listing, that is created in Service/Warranty Equipment from Inventory Maintenance, will now update the service ticket step with the associated parts.

- If a Problem Code is assigned to the service ticket / repair item the parts added will be as defined by the Repair Parts listed for the assigned problem code.
- If no Problem Code is assigned to the service ticket / repair item assign the parts will be added as defined by the generic Repair Parts listing.

SERVICE TICKET CREATION: ORDER BASED SERVICE TICKETS

Service Tickets can now be added as an Order Based work ticket. As an order based work ticket, the Item No and MFG Serial No, will be assigned to all steps created for the service ticket and each step represents a process to be performed on the repair item.

For steps greater then Step 001, the Item No and MFG Serial No will be disabled and cannot be modified.

TECHNICIAN DASHBOARD

TECHNICIAN DASHBOARD: REFRESH

A Refresh button has been added to Technician Dashboard so that the user no longer has to exit the dashboard and relog in to refresh any updated or modified scheduling events.

Currently this technician has 1 scheduled service ticket.

The screenshot shows the Technician Dashboard ribbon with icons for Schedule, Misc Time, Arrive, Parts, Notes, History, Expenses, Depart, and Message. Below the ribbon, the technician information is PR-K100 (Nick Klien). The Ticket No field shows 0 / 1, and the Current Status is Available. A red box highlights the Ticket No field and its navigation controls.

After selecting the  button located in the lower left hand corner, his scheduled service tickets has been updated to 3.

The screenshot shows the Technician Dashboard after a refresh. The Ticket No field now shows 0 / 3, indicating that the number of scheduled service tickets has been updated. The Current Status remains Available. A red box highlights the updated Ticket No field and its navigation controls.

TECHNICIAN DASHBOARD: MISC TIME

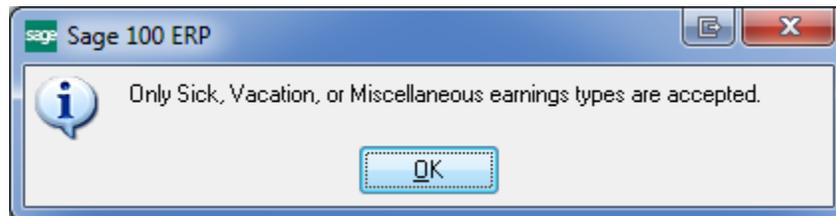

A Misc Time button has been added to the Technician Dashboard ribbon. When selected the technician may entered time that is not being coded to a service ticket. Only earning codes that have an earnings type of Miscellaneous may be entered.

The screenshot shows the Technician Dashboard ribbon with the Misc Time button highlighted by a red box. The other buttons (Schedule, Arrive, Parts, Notes, History, Expenses, Depart, Message) are also visible.

When the Misc Time button is selected, the user will be presented with a data entry screen that allows them to enter in the following information.

- Start Time and End Time – These fields are available if Time Tracker has been activated and Capture Start / Stop times option has been selected.
- Hours Worked – This field is available if Time Tracker has been activated and Capture Start / Stop times option has been is NOT selected OR if the Time Tracker add-on has not been purchased.
- Earning Code – The user may only enter in earning codes set as earning type Miscellaneous, Vacation or Sick.
 - If an earning code is entered that is not one of the above, the following message will be displayed.

Once the Misc Time has been accepted, the user will not be able to modify this time.
