Web Hosting for
Sage 100 Contractor March Madness!
Offer valid until March 31st, 2014

50% off setup!

3 Easy Steps!

Moving your Sage Software and data to the Cloud is easy and uncomplicated with Trapp Online's 3-step UP Program. Most of our clients are implemented in two days or less with little or no down time. A skilled technician will work with you to develop an acceptable time line for YOUR transition.

Get started with the online Sign UP Form. Next, we'll Load UP your software and a copy of your data. Finally, in our Set UP process, our techs will work with all of the users to establish access to the cloud. Application and data verification along with any troubleshooting will also be addressed during the final Set UP process.

You and your accountant will be UP with 1 phone call.

3. Set UP

You, plus any additional users.

Your Accountant.

2. Back UP
